DESCRIPTION

This pile fleece with zip is made with an innovative micropile Polartec Eco-Engineering fabric using 100% recycled material obtained from plastic bottles.

The model is an eco-sustainable fleece, warm and soft, which provides superior performance in terms of breathability, comfort and durability. In addition, the production process for the Polartec material adheres to the highest standards of compliance and responsibility in order to reduce the environmental impact.

This work fleece is characterised by hot press finishes on the left side of the chest and the cuffs, whilst the right side has a reflective print of the logo, "U-Power". We are talking about a sports fleece, perfect at any time of the day, even for free time. Venus has 3 pockets: 2 at the bottom and a vertical one on the chest, all with zip closure.

Fleece in sustainably-produced polar fabric with reinforcements in contrasting stretch material on both the pockets and on the forearm and the bottom inner side.
